REASONS FOR ALLOWANCE

Herein claims 37-50 have been allowed and when combined with the previously allowed claims 26-36 make the total claims that have been allowed to include claims 26-50, which have been renumbered as claims 1-25.

Regarding claims 37-50, the following is an examiner's statement of reasons for allowance: As discussed in an personal interview on May 29, 2003, there was no motivation to combine Konuma, US Patent 5,595,638 with Applicant's admitted prior art. Konuma teaches the use of anodic oxidation to formation a dense, pinhole-free layer (1, 21+) which teaches away from using anodization to form nanoholes in a layer. Therefore, the rejections over Konuma have been removed.

Further, no other prior art could be located that taught forming nanoholes in an Al film wherein the the anodizing includes a first process in which an anodization current is at a steady value and a second process in which the anodization current decreases after said first process, and wherein said first process and said second process occur consecutively.

For completeness, the examiner's statement of reasons for allowance regarding the previously allowed claims 26-36 is: Prior art could not be located that taught anodizing while monitoring an anodization current wherein the anodizing terminates when a reduction in said anodization current from a steady-state value is detected.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
